Commerce, Store Operations
and Delivery Management Proposal

Prepared by Sankalp | [Client / Organization Name] | [DD Month YYYY]

Reusable reference proposal | Version 1.0

HR Operations Overview

Sankalp ERP provides Simhapuri Fresh with a tenant-secure HR and payroll foundation for maintaining employee records, configuring income-tax slabs, managing leave requests, preparing payroll, issuing payslips and posting the related financial entries to accounting.

The current implementation is designed for controlled administration by authorized HR and management users. Employee and payroll records are tenant-scoped, validated at the API boundary and connected to the accounting service through authenticated service calls.

Completed capability summary

* Employee master records
* Employee ID and email uniqueness within a tenant
* Department, position, hire date and salary details
* Employee bank account and bank name fields
* Active/inactive employee status with soft deactivation
* Employee detail view with recent payroll and leave history
* Delivery-executive attributes for employees who perform delivery work
* Tenant-scoped APIs and role-based write controls

Current user access

* **Admin:** full HR administration and payroll control
* **Manager:** employee updates, tax-slab management, leave approval and payroll operations
* **Authorized employee context:** records are restricted by tenant and authenticated request context

Leave and Tax Management

Leave management

The completed leave workflow allows authorized users to create, list, inspect and manage employee leave requests.

Available features

* Leave request creation
* Annual, sick, personal, maternity, paternity and unpaid leave types
* Start date, end date and reason
* Paginated leave listing
* Filter by employee and status
* Employee identity shown with each request
* Manager or Admin approval
* Manager or Admin rejection
* Employee-side cancellation for pending or approved requests
* Protected state transitions
* Tenant-scoped leave records

Leave states

‘‘‘text

PENDING -> APPROVED

\-> REJECTED

PENDING / APPROVED -> CANCELLED

Payroll and Accounting Integration

The completed payroll workflow supports employee-level monthly payroll records and the following controlled state machine:

‘‘‘text

DRAFT -> PROCESSED -> PAID
