

TRUSTWOOD ENTERPRISE

ENTERPRISE PLATFORM

Business Operations, Finance and Workforce Management Proposal

Prepared by Sankalp Platforms | Trustwood Enterprise | 08 August 2026

Confidential proposal | Version 1.3

Completed Business Capabilities

Sales and order management

* Customer records and customer addresses
* Online order creation (Sales Request from Customer Centre)
* Order listing and detail views
* Order confirmation with stock reservation
* Order cancellation with stock release
* Order shipment with stock deduction
* Invoice creation linkage through accounting
* Sales return foundation
* Coupon validation and order discount linkage
* Paginated and filterable order APIs

Catalogue and inventory

* Product catalogue management
* Product categories and category hierarchy
* Category sorting and featured controls
* Brand management
* Product SKU and barcode lookup
* Product availability and visibility controls
* Warehouse stock levels
* Manual stock adjustment
* Stock reservation, release and deduction
* Stock movement history
* Low-stock and inventory report foundations

Procurement and finance

* Vendor and purchase-order foundations
* Goods receipt and stock receiving foundation
* Purchase-return foundation
* Chart of accounts and journal entries
* Sales and purchase invoice foundations
* Payments and payment status foundations
* Taxes, credit notes and debit notes

Completed Operations and Workforce Capabilities

Delivery operations

* Delivery zones, pincode serviceability and order assignment
* Assignment listing, detail and delivery status transitions
* Delivery tracking, earnings and compensation foundations
* Cash and online delivery reporting foundation

Reporting and analytics

* Sales totals, order counts, top-product, customer and order summaries
* Period and date-range filtering through tenant-scoped report APIs
* Inventory stock, low-stock, valuation and movement reports
* Delivery assignment, earnings and status summary reports

Notification component

* Tenant-scoped in-app notification records with paginated listing
* Unread count and mark-as-read controls
* Device-token registration and removal
* FCM push delivery integration when configured
* Notification event foundation for order, operational and system events

Enterprise messenger

* Customer-to-staff conversation creation with controlled staff assignment
* Tenant- and participant-scoped conversation access
* Text messages, file attachments and voice messages
* Voice recording upload and playback
* Conversation listing, read history and participant controls

Administration and reporting foundations

* Admin portal navigation, paginated APIs and role-controlled mutations
* Sales, stock and delivery reporting foundations
* Soft deactivation, Zod validation and tenant-scoped operational evidence

Customer Centre - Complete Features

The Trustwood Customer Centre is live as a branded, mobile-first web portal (installable PWA). Buyers browse catalogue, place Sales Requests, track fulfilment and talk to staff without using the admin desk.

Access and identity

* Tenant-branded sign-in and registration
* Email and password login
* Google Sign-In (Identity Services)
* WhatsApp OTP login (Fast2SMS, per tenant) for phone-first buyers
* WhatsApp number linking and verification on the profile
* Password set-up for accounts created with Google
* Authenticated session with tenant-scoped APIs

Browse and catalogue

* Home with banners, featured products and recently viewed items
* Shop by category and catalogue groups (e.g. BWP, blockboard, laminate)
* Configurable products (size, finish, colour) with area or each pricing
* Product images, SKU and starting price
* Search across products, groups and SKU
* Product detail with availability and add-to-cart
* Responsive layout: bottom nav on mobile, wide portal on desktop

Customer Centre - Commerce and Account

Cart, checkout and orders

* Persistent cart with quantity, line totals and tax estimate
* Checkout: saved address or new address, notes and bill summary
* Tax / GST line on the bill (Rs. 0 when product tax is unset)
* Inventory reservation at checkout
* Places a Sales Request (SREQ); sales converts to Sales Order (SO)
* My orders / requests list with status labels
* Request detail: timeline, items, totals, delivery address
* Cancel while the request is still open
* Reorder into cart
* Invoice / document PDF download after SO invoicing
* SO and delivery status visible on the request after convert

Account, support and experience

* Profile overview, personal details and preferences
* Address book (add, edit, default)
* In-app notifications inbox
* Support entry pointing to sales desk / request number
* Customer dashboard with configurable widgets
* Wallet balance foundation where enabled
* In-app messenger: text, attachments and voice to Trustwood staff
* Installable PWA, service worker, offline shell and update prompt
* Navigation: Home, Shop, Cart, Orders, Messages

In Progress

The following items are committed in this commercial scope and are not yet complete.

1. WhatsApp integration

Beyond OTP login (already live), Trustwood will receive business WhatsApp:

* Order and Sales Request status alerts on WhatsApp
* Catalogue / offer messages where templates are approved
* Two-way customer support on WhatsApp linked to the in-app conversation
* Tenant Fast2SMS / WhatsApp Business configuration, template approval and delivery reports
* Depends on Trustwood WhatsApp Business / Fast2SMS account, DLT templates and message credit

2. App development

Native store apps wrapping the same Customer Centre (no separate UI fork):

* Android (Play Store) and iOS (App Store) via Capacitor
* Device install, splash, safe-area and store listing assets
* Push notification behaviour on device
* Same catalogue, cart, orders and messenger flows as the web PWA
* Store review, signing keys and listing copy are part of this track

Commercial Framework

All amounts are in Indian Rupees (INR). GST extra unless stated otherwise.

Software development

Item	Amount (INR)
Software development (Customer Centre + ERP platform)	Rs. 1,80,000
WhatsApp integration (in progress)	Included
App development - Android and iOS (in progress)	Included
Tenant setup and go-live configuration	Included
Hosting during delivery (Sankalp host)	Included
Software total	**Rs. 1,80,000**

Payment schedule

Milestone	Share	Amount (INR)
Beta version	20%	Rs. 36,000
Complete feature delivery	50%	Rs. 90,000
Bug fixes and PRD promotion	30%	Rs. 54,000
Software total	**100%**	**Rs. 1,80,000**

Monthly maintenance

Item	Amount (INR)
Monthly fee	Rs. 5,000
Duration	6 months
Maintenance total	**Rs. 30,000**

Maintenance covers production monitoring, defect fixes in delivered scope, dependency and security patches, and operational support. New features outside this proposal are estimated separately.

Commercial Assumptions and Approval

Project total

Item	Amount (INR)
Software development	Rs. 1,80,000
Maintenance (6 months)	Rs. 30,000
Project total (excl. GST)	**Rs. 2,10,000**

Assumptions

* Payment milestones are invoiced on Sankalp Platforms written confirmation of beta, feature complete, and bug-fix / PRD promotion closure.
* WhatsApp message credits, DLT / template fees, Google Play and Apple Developer fees, and SMS/OTP provider charges are billed at actuals or paid by Trustwood to the provider.
* GST and statutory taxes extra.
* Change requests outside this scope are estimated and approved separately.
* Features are subject to agreed configuration and acceptance criteria.

Provider

Sankalp Platforms supplies the multi-tenant ERP, Customer Centre, implementation and operational guidance for Trustwood Enterprise.
